Portfolio Website  
Wackingerstrasse 13, 94469  
Deggendorf Deutschland  
Place of birth: **Warangal, India.**  
Date of birth: **23 Oct 2001**

## SKILLS

- **Robotics & Simulation:**  
ROS 2, Gazebo, MATLAB, Simulink, Isaac Sim  
(Proficient)
- **CAD Design:**  
SOLIDWORKS, Fusion 360, AutoCAD (Advanced)
- **Programming:**  
Python, C, C++, Git  
(Proficient)
- **Electronics:**  
Arduino, Raspberry Pi, STM32; Sensors, Actuators,  
(Advanced)
- **VR & 3D Development:**  
Unity, C#, VR Development, Blender (Proficient)
- **Productivity Software:**  
Microsoft Word, Excel, PowerPoint (Advanced)

## LANGUAGES

- English - C1 (Full Professional Proficiency)
- German - B1; (B2 in progress) (Independent User)

Deggendorf, 18th September 2026

## EDUCATION

**MASTER OF ENGINEERING** Mechatronics and Cyber-Physical Systems  
*Deggendorf Institute of Technology.* **Since October 2024**

◊ Robotics, Additive Manufacturing, Virtual Reality Development, Autonomous Control Systems

**BACHELOR OF TECHNOLOGY** Mechanical Engineering  
*Mahindra University.* **August 2019 - July 2023**

◊ Thesis title: *Robotic Exosuit for Lower Arm*

◊ I conceptualized and developed a soft Exosuit tailored to empower individuals with disabled arms, facilitating their daily activities with ease.

## EXPERIENCE

**ROBOTICS INTERN** at *Handzylectro Labs*  
(Hyderabad, India). **June 2023- March 2024**

◊ As a Robotics Intern at Handzylectro Labs, I prototyped, designed, and developed the Aerial Manipulator project.

**INTERN** at *CPPDAM, Osmania University*  
(Hyderabad, India) **October 2022 - December 2022**

◊ As an intern at CPPDAM, I gained a deep understanding of 3D printing technology and its applications across various fields.

## ACADEMIC PROJECTS

**PARAMETRIC BEVELOID GEAR DESIGN**  
*Deggendorf Institute of Technology* **February 2026 - July 2026**

◊ Created and 3D Printed a Lua-based parametric model for conical involute gears, implementing mathematical models and Additive Manufacturing techniques.

**AUTONOMOUS ROBODOG NAVIGATION SYSTEM**  
*Deggendorf Institute of Technology* **October 2025 - January 2026**

◊ Built an embedded autonomous navigation system for a robodog using Arduino/ESP32 and multiple sensors for localization and motion control

**VR DEVELOPMENT PROJECT: "PEDESTRIAN SIMULATOR"**  
*Deggendorf Institute of Technology* **February 2025 - July 2025**

◊ Design and implement a realistic VR simulation that enhances road safety by immersing users in a pedestrian's perspective.

## CERTIFICATES

INTRODUCTION TO MECHANICAL ENGINEERING DESIGN AND MANUFACTURING WITH FUSION 360 (*Autodesk*) **July 2024**

PYTHON FOR DATA SCIENCE, AI & DEVELOPMENT  
(*IBM*) **March 2024**

SIMULINK ONRAMP COURSE (*MathWorks*) **October 2023**

MODERN ROBOTICS, COURSE 1: FOUNDATIONS OF ROBOT MOTION  
(*Coursera*) **April 2023**

ARTIFICIAL INTELLIGENCE (*Verzeo*) **September 2020**
